DEEPAK GEHLOT

Senior Flutter Developer | Flutter & Dart | iOS & Android | Clean Architecture | BLoC | Offline-First | Python & AI

Indore, India | 1deepakgehlot@gmail.com | 8827987615 | LinkedIn: linkedin.com/in/deepak-gehlot-82933a91 | Portfolio: deepak-gehlot.github.io

PROFESSIONAL SUMMARY

- Senior Flutter Developer with 10+ years of mobile and software development experience, including 8+ years in Flutter across Android, iOS and Flutter Web, and 3+ years in native Android development.
- Sole frontend developer on multiple production apps (iPlanned, Eventum, MeeTicket, Webtoon, eRecordStudio), owning architecture, full feature development and App Store / Play Store releases.
- Experienced in scalable Flutter architecture, reusable components, API-driven apps, Firebase integrations, performance optimization and production release support.
- Builds AI features and Python backends: RAG with LangChain and OpenAI, served from FastAPI and streamed into Flutter clients.
- Strong background in banking, government, event-tech, SaaS, marketplace and media apps, working remotely with product, backend, QA and design teams.

CORE SKILLS

Flutter / Dart	Flutter, Dart, Flutter Web, responsive UI, custom widgets, animations, production app development
Architecture	Clean Architecture, MVVM, MVC, feature-based structure, repository pattern, service layers, GetIt dependency injection
State Management	BLoC / flutter_bloc, Cubit, Provider, architecture-driven state separation
API & Backend	REST APIs, JSON, Dio/HTTP, authentication flows, token handling, error handling, pagination
Python & AI	Python, FastAPI, async SQLAlchemy, PostgreSQL; RAG with LangChain, OpenAI embeddings and Pinecone; streaming LLM responses into Flutter
Firebase	Firebase Auth, FCM, Cloud Firestore, Analytics, Crashlytics, Remote Config
Mobile Features	Google Maps, Mapbox, geolocation, camera/video, audio/video workflows, Jitsi video calling, chat, payments, in-app purchases, push notifications
Security	Secure storage, biometric authentication, SSL pinning, short-lived JWTs
Cloud & Release	AWS EC2 and S3, App Store and Play Store releases, build flavors
CI/CD & Tools	Git, GitHub/GitLab, pull-request workflows, code review, Datadog, feature flags, Android Studio, VS Code, Xcode, Jira, Postman, Figma
Data & Offline	SQLite, Hive, offline-first persistence, caching, retry/failure handling

PROFESSIONAL EXPERIENCE

Senior Flutter Developer | Glytex Tech Consultancy | Remote | Dec 2025 – Present

- Working on OM Bank, an enterprise-grade digital banking app for Old Mutual (South Africa), using Flutter and Dart with a strong focus on scalable, secure, production-ready development.
- Developing and maintaining features using Clean Architecture with clear separation across presentation, domain and data layers.
- Implementing complex application flows using BLoC / flutter_bloc for predictable, maintainable and testable state management.
- Taking part in solution design discussions and working with the design team on the design system and reusable components.

- Working with GitHub pull-request workflows, code reviews, automated testing, build validation and CI/CD practices.
- Using Datadog for monitoring, logging, debugging and production issue analysis; handling maintenance work and ITSM tickets.
- Implementing feature flag-driven functionality for controlled rollouts, environment-specific behaviour and safer releases.
- Worked on biometric authentication, including device capability validation, enrollment checks, secure authentication flows and platform-specific Android/iOS handling.

Senior Software Developer – Flutter | Happening Design | Remote | Dec 2022 – Dec 2025

- Sole frontend developer for iPlanned, Eventum, UMO Eventum and ME Ticket App, building Flutter Web and mobile apps for event-tech, SaaS and government clients.
- Built responsive Flutter Web flows, reusable UI components, event and session management workflows, ticketing, checkout and QR ticket features, and API-driven user journeys.
- Owned architecture and code structure: feature-based modules, reusable components, refactoring and performance optimization.
- Integrated REST APIs, Firebase services, payment flows and third-party SDKs across web and mobile platforms.
- Worked remotely with product, design, backend and QA teams to deliver features and resolve production issues.

Senior Mobile Application Developer – Flutter / Android | Worthply Technologies Pvt. Ltd., Indore | Apr 2018 – Nov 2022

- Sole frontend developer and technical lead on eRecordStudio: led technical discussions with the client, coordinated the backend developer, managed AWS EC2 and S3, and handled App Store and Play Store releases.
- Sole Flutter developer on Webtoon, a children's storybook app for a South Korean publisher, with offline caching and in-app purchases.
- Designed, developed and maintained cross-platform mobile apps using Flutter and Dart for Android and iOS.
- Implemented Provider and BLoC/Cubit state management with clear separation between UI, business logic and data handling.
- Integrated REST APIs, Firebase notifications, maps and location flows, payment gateways, media features and third-party SDKs.
- Improved app stability and user experience through debugging, performance optimization, widget rebuild reduction and production issue resolution.

Android Developer / Software Developer | Rudiment Website Solution | Dec 2016 – Apr 2018

- Developed Android applications using Java and the Android SDK with API integration, UI implementation, debugging and client-focused feature delivery.
- Worked with small teams to deliver mobile features, bug fixes and app improvements across Android projects.

Junior Android Developer | Widevision Technologies | Dec 2014 – Dec 2016

- Started in native Android development with Java and the Android SDK: UI implementation, backend API integration and mobile lifecycle fundamentals.
- Built foundations in debugging, client delivery, app maintenance and mobile application development.

SELECTED FLUTTER PROJECTS

- **OM Bank** (Google Play): Enterprise digital banking app for Old Mutual. Flutter development in the mobile team: Clean Architecture, BLoC, biometric authentication, feature flags, Datadog observability and production-quality feature delivery.
- **eRecordStudio** (Google Play | App Store): Sole frontend developer and technical lead. Platform for musicians to rehearse, record and share sessions: in-app Jitsi video calling via native platform views (iOS, Android, Flutter Web), per-participant recording, server-side FFmpeg merge into one video, and social features (likes, comments, shares). Managed AWS EC2/S3 and both store releases.
- **iPlanned** (iplanned.io): Solo-built estate planning Flutter Web platform: legal document generation, asset management and secure user flows. Architected the feature-based structure and delivered responsive UI, full

feature development, REST API integration, state management and release support.

- **Eventum and UMO Eventum** (eventum.co): Sole frontend developer. Event-tech platform for event discovery, booking and check-in; built Flutter Web and mobile flows for event and session management, ticketing and checkout, with reusable components and API integration.
- **ME Ticket App (MeeTicket)** (Google Play): Sole frontend developer. Government of Telangana ticketing app for parks, temples, zoo and transport (100K+ downloads): login, destination browsing, booking with per-category pricing, payment flow and QR tickets.
- **Webtoon** (Google Play): Sole Flutter developer. Children's storybook app for a South Korean publisher (10K+ downloads): story library and reader, on-device caching and in-app purchases.
- **Huptown – Ride, Fly, Experience**: Travel and experience booking platform covering ride booking, flight booking, hotels/accommodation, driver app flows, maps/location, APIs and multi-app user journeys.
- **Katha – Script, Record and Share Your Testimony**: Flutter app using Provider with video recording, timer, text prompter, community flows, social sharing and backend/admin integration.
- **AI Knowledge Assistant (side project)**: RAG app over Flutter documentation. Python FastAPI backend with LangChain, OpenAI embeddings and Pinecone, deployed on Railway; Flutter client in Clean Architecture with streamed answers parsed into BLoC states and Hive-cached query history.

EDUCATION

- Bachelor of Engineering – Computer Science | Oriental Institute of Science & Technology, Indore | 2014
